

A Complete Solution to Coin Counting, Sorting and Wrapping

The Cassida C300 is the leading commercial grade coin counter, sorter and wrapper. With 20 year expertise in cash handling solutions, Cassida designed the C300 with the user in mind, creating an all-in-one solution for any coin handling need.

Easy to Use

The C300 counts, sorts, adds, batches, and wraps the coins (U.S. Coins: Dollar Coins, Quarters, Nickels, Dimes and Pennies). It recognizes individual denominations and sorts them automatically into bins or tubes (for wrapping/rolling) depending on your needs. No dials and no knowledge of coin dimensions required. Just load the hopper, press start, and walk away. With the pre-load "One Press" features, just press on one button for the C300 to stop automatically and emit a beep when the bins or wrappers are full.

Fast, Reliable and Accurate

While the C300 is accurately counting and sorting at a speed of 300 coins per minute, the large easy-to-read LCD display shows both the number of coins and the dollar amount for each denominations, as well as the grand total of all coins. At the end of your tally, simply pair the C300 with the Cassida Thermal Printer (sold separately) to print a detailed receipt of your count to make bank deposits easy and keep your personal records organized.

Innovative and Efficient Sorting and Wrapping

Unlike standard coin counters where you remove the tube and load the coin wrapper, Cassida C300 comes armed with Quick Load coin tubes allowing you to slip the Cassida coin wrapper in and out of the coin from the base of the tube with ease. The C300 modern and innovative design comes with magnetic technology to effortlessly slide in and out the bins and the coin tubes out of the machine. The C300 is quiet in operation and its compact size makes it the perfect addition to any desk.

An Excellent Choice for Counting, Sorting and Wrapping Coins

- Countable Coins: 1¢, 5¢, 10¢, 25¢, \$1
- Hopper Capacity: 1,900 coins
- Coin Bin Capacity: 850 for double and 400 for single
