

Omni-ID™

Counterfeit Detector with UV ID Verification Light

- ▶ Combines infrared currency counterfeit detection with easy UV validation of ID cards, passports, credit cards and more!
- ▶ UV LED identification verification lights are long-lasting and brilliant— so checking the authenticity of an ID is easy in any lighting environment!
- ▶ Quick and conclusive: confirm a bill's authenticity in less than a second with a clear "PASS" or "FAIL" indication.
- ▶ Advanced counterfeit detection: Scans money and cross-references a comprehensive database of infrared, magnetic and ultraviolet markings to confirm authenticity.
- ▶ Cassida is America's #1 brand in business-grade currency handling solutions. Backed by a one-year warranty and a helpful, US-based support team.
