DFCHECKPRO™
cloud-based check printing solution

The market-leading check printing software is now in the cloud!

Streamline your process and print teller documents efficiently and securely.

DFCheckPro Teller has been designed to streamline the production of all counter-generated check documents by integrating with your core banking platform, utilizing cloud-based technology and the very best in MICR laser technology.

Designed and built with security in mind, this state-of-the-art cloud-based application is highly configurable, fast to deploy, and provides a low cost of ownership for all your check printing needs.

DFCheckPro Teller prints highly secure cashier's checks, loan coupons, starter checks, deposit and withdrawal slips, and much more in one pass of the printer, following strict security protocols. The result is a professional-looking and highly secure teller document that will be printed in a matter of seconds while your customer waits.

Accessing our check production application has never been easier with the ability to use any desktop, laptop, or even a mobile device within your business (user requirements and security settings apply), allowing for flexible printing and auditing across your branch network.

DATA FINANCIAL, INC.

4909 W. Oakwood Park Drive • Franklin, WI 53132 • 800-334-8334 • 262-243-5511 • FAX 262-304-3001 • www.datafinancial.com

Benefits at-a-glance – Moving to DFCheckPro Teller will help you:

- Reduce IT Costs – No need to manage and maintain outdated, on-premise applications.
- Improve Security – All communication to and from the application is encrypted.
- Stay Up to Date – Regular software updates will be managed by Data Financial Inc. under your support contract and will be applied automatically with little to no downtime, outages, or interruptions.
- Stay Flexible – Access from any device with an internet connection and modern web browser, even mobile devices*. Windows 8 or above is required for the print application.
- Recover from Disaster – Should there be a need to recover following a disaster, DFCheckPro will save you valuable time and other precious resources by protecting your check printing data and systems.

Cloud-Based Technology For Your Business

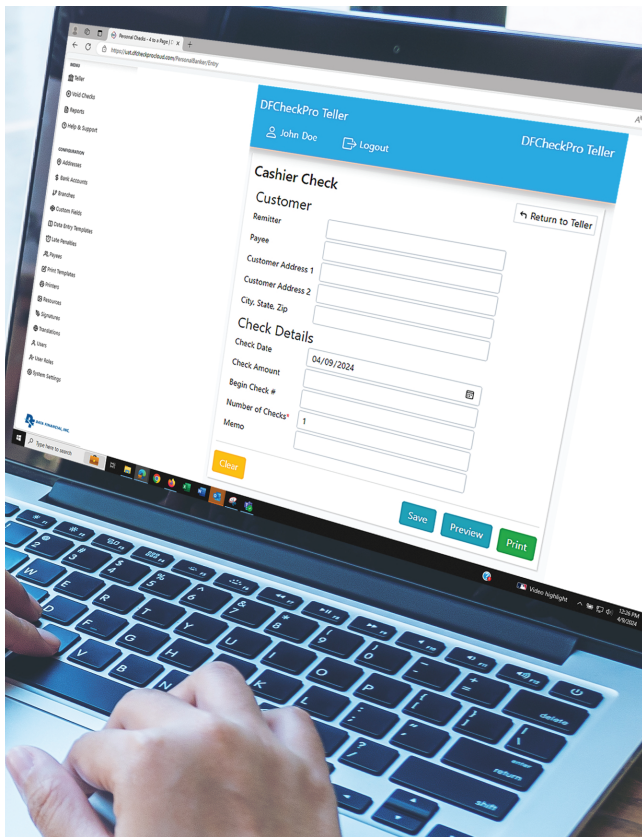

SaaS (Software as a Service) is the most common form of cloud computing for businesses. You can access internet-hosted software applications using a browser rather than traditional applications stored on each teller station or server. With the new check-writing software from Data Financial, Inc. now running on Microsoft Azure cloud servers, we are responsible for managing and maintaining the application, including all software updates and settings.

What this means to your business

Moving your on-premise counter-based applications into the cloud will save time and money by reducing the demand for IT to manage and maintain your current software, providing you with automatic updates, and ensuring you always produce the highest quality checks in the most secure environment available.

It will also protect your business processes, which is an important part of continuity planning. Whether you experience a natural disaster, power failure, or other crisis, having your data stored in the cloud ensures it is backed up and protected in a secure and safe location.

Being able to access your data again quickly allows you to conduct business as usual, minimizing downtime and loss of productivity that can affect customer service.
