

Why the Cloud?

Our **DFCheckPro Corporate** solution provides solid cost-saving benefits along with proven functional features like regular data backups, ease of use and the ability to scale to your individual needs quickly.

Perform regular data backups: **DFCheckPro Corporate** makes regular data backup easier than on-premise servers ever could. This ability to access information that would otherwise have vanished means you mitigate any risk of losing critical information in a disaster recovery situation.

Reduce IT staff's responsibilities: With **DFCheckPro Corporate**, your IT staff will not have to take the time to install new software patches or updates freeing up their valuable time for more important work.

Adjust quickly to your Specific Needs: Cloud-based technology moves with your business and is built to scale. **DFCheckPro Corporate** can be quickly expanded to meet the needs of your business as it grows. You will never have to worry about slowing down because your equipment cannot keep up.

Provide access anytime from anywhere: With **DFCheckPro Corporate**, your authorized users can work from any station on your branch network rather than being limited to dedicated machines with on-premise software. This provides complete flexibility with cover for vacation time or periods of sick leave and makes everything so much easier for your staff.

Designed for your budget: To keep your initial costs low, **DFCheckPro Corporate** is based on an affordable monthly subscription. Cloud features can be adjusted, added or left out of plans altogether so you only pay for what you need.

Eliminate capital expenses: While on-premise applications are considered a capital expense, cloud computing is an operational expense. Eliminating the large initial investment in hardware, **DFCheckPro Corporate** can be budgeted as a reasonable monthly expense.

Disaster Recovery: Downtime in your services leads to lost productivity, revenue and brand reputation. Being in the Cloud provides quick data recovery for all kinds of emergency scenarios.

Competitive Edge: When you implement your Cloud solutions before your competitors, you will be further along the learning curve by the time your rivals decide to meet you in the Cloud.

DFCheckPro Corporate is Green. Our cloud solution eliminates the cost of powering and maintaining on-premise servers. As a result, your energy costs are lower and better for the planet.
