CASHINFINITY™

SMART Cash Management

SMART Cash Management, CASHINFINITY

GLORY Retail Solution offers SMART cash management. It provides total secure closed cash handling, centralized control of cash inventory and optimization of all cash processes throughout a store. CASHINFINITY is the most advantageous cash management system with remarkable flexibility and extensibility for retailers to fit any size of store, various business segments and each investment plan.

Cash handling within the retail sector is costly and requires significant staff resources at all steps of the process. That's why accuracy, efficiency and security are important. The retail sector is very diverse, and therefore a complete range of solutions is necessary to cater to the specific needs of each shop or chain store.

CASHINFINITY offers many benefits for retailers

High security
against attacks
and theft

Improves productivity,
customer service and
fund efficiency

Eliminates
discrepancies
in cash

Reduces
CIT pick up
and delivery

Real-time inventory
of cash / status
management

1 CI-100

The cash recycling system CI-100 handles not only the interface cassette of the CI-10 but also the loose notes from a manual cash drawer. This unique function gives retailers flexibility and extensibility. Direct coin dispense into the specified manual cash drawer enables the cashier to prepare change funds quickly and easily. Two types of banknote collection (safe bag or collection cassette) are available.

2 Interface cassette

The interface cassette is a key component of the CASHINFINITY secure closed cash management. Interfacing CI-10 and CI-100, banknotes are transported securely from front office to back office or from back office to front office without exposure.

3 CI-10

The compact cash recycling system CI-10 is stylishly designed in straight lines so that it can be integrated into cash desks and self-checkouts easily. A "Follow me" LED sign helps customers to operate the device by themselves comfortably. A stacking collection cassette is also available, in case the CI-100 is not part of the system.

4 CI-SERVER

CI-SERVER cash management software can be operated via a web browser, offering centralized cash management throughout a store: within the front/back office, when the interface cassette is in transportation and the safe in the back office.

5 Integration into POS system

CASHINFINITY uses its existing POS system network so that there is no need to invest in additional infrastructures. With CASHINFINITY, our strategy is to be open and able to integrate with other systems.

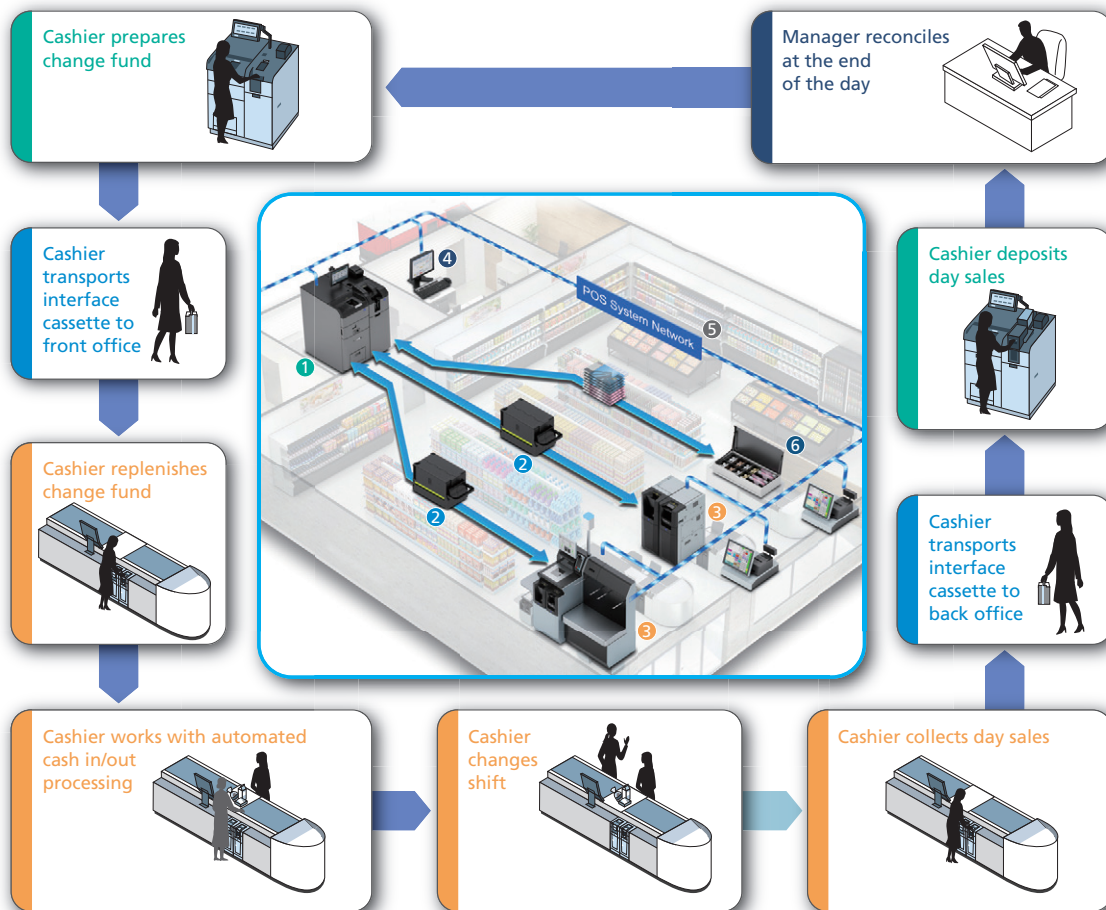

6 Manual cash drawer

CI-100 counts and dispenses in two ways: loose notes and also via the interface cassette, so that not only the CI-10 but also manual cash drawers can be available at the checkout. This remarkable flexibility allows various deployments to be made to suit different investment plans.

Streamlines daily work of manager / cashier

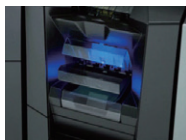

Functionality highlights

Exit shutter

Avoids handing over partial change to a customer in the event of an incomplete dispense due to jamming/inventory issues.

CI-10B

Collection through outlet

Allows for non-stop coin collection into the bag/tray.

CI-10C

Slide extension unit

Makes integration into various cash desks easier, height is also adjustable.

CI-10B

CI-10C

Direct coin dispense into manual cash drawer

Offers the cashier an easy and fast operation when preparing change funds.

CI-100C

Free layout of recycle module

Frequently used denominations can be assigned to multiple recycle modules.

CI-10B

CI-10C

CI-100B

CI-100C

CI-200B

CI-300B

Reject foreign objects

Enables non-stop counting and reduces jam rate.

*Limitations to the size and shape of foreign objects which can be removed.

CI-10C

CI-100C

Error recovery animation

If an error occurs, the POS screen can show a troubleshooting animation to resolve the problem.

All machines
